GATE SCORE COMPUTATION

The GATE 2026 score is calculated using the formula:

$$\text{GATE Score} = S_{\mathrm{q}} + (S_{\mathrm{t}} - S_{\mathrm{q}})\frac{M - M_{\mathrm{q}}}{\bar{M}_{\mathrm{t}} - M_{\mathrm{q}}}$$

where,

M is the marks obtained by the candidate in the test paper mentioned on the GATE 2026 Score Card

M_{q} is the qualifying marks for general category candidates in the test paper

$\bar{M}_{\mathrm{t}}$ is the mean of marks of top 0.1% or top 10 (whichever is larger) of all the candidates who appeared in the test paper (Including all sessions in case of multisession papers)

S_{q} = 350, is the score assigned to M_{q}, and

S_{t} = 900, is the score assigned to $\bar{M}_{\mathrm{t}}$

In the GATE 2026 score formula, the qualifying marks for the general category candidate in each subject will be:

Qualifying marks for GENERAL category, M_{q} = max (25, min (40, $\mu + \sigma$))

where μ is the mean and σ is the standard deviation of marks of all the candidates who appeared for the test paper.
